

HOW TO CONNECT TO THE ILYC Google calendar

When you click to open the Calendar you see a web page with all the events, but the search function is not available.

In order to see it you must add the "ILYC" calendar to your Google calendars

In order to do it you have to:

1) the first time you connect to the calendar click on the blue icon down on the right with written aside "Google Calendar" in different colours that you will have to click the next time you connect.

In your Google Calendar you will see this new calendar: ILYC;

2) Leave only the ILYC calendar flagged and click on the lens above on the right;

3) Insert your search key words and you will see only the events which contain those key words;

4) We suggest you use the Schedule option in the Schedule menu above on the right to see the events.
